Starting Out in Sustainable Agriculture

New farmers and ranchers today have access to a tremendous number of resources to help them with planning, securing land, and making a success of their operation. A few states and counties even provide special aid and enticements to encourage new farmers to settle within their borders. This issue of ATTRAnews looks at some of the ways beginning farmers and ranchers can find a place and learn to run it.

Advice to New Farmers  By Tracy Mumma, NCAT Program Specialist

1. Make friends with your neighbors, and admit you know nothing. Neighbors can teach you everything from how to run your irrigation equipment to how to load a reluctant cow in a trailer. If you have friendly Amish neighbors, they may be willing to teach you a lot more.

2. Take all the advice you get from your friendly neighbors, and refine it with the advice offered by books, Extension, and experts.

3. Keep all that advice in the back of your mind as you do the best you can on a daily basis, which often means doing things late, not according to plan, and in totally unorthodox fashion.

Tracy Mumma, her husband David Sturman, and their two children live and farm in Montana with the help of their Amish neighbors.

Some states and counties are doing their best to attract new farmers or to promote organic agriculture. In northwest Iowa, for example, a majority of farmers are past the normal age of retirement. Woodbury County has embarked on a program to bring in new farmers, especially those interested in organic production and entrepreneurship. The county is basing its economic development on the creation of small family farms, organic processing, and local food systems.

In 2005 the county enacted an Organics Conversion Policy that rebates 100 percent of real property taxes for five years to farms that transition to organic production. The policy also commits to finding a market for local organic products, along with financing and educational resources and the counsel of experienced organic farmers. In 2006 Woodbury County adopted the first mandatory Local Food Purchase Policy in the nation.

Marathon County in north central Wisconsin sponsors the U Can Farm program, inviting farmers and farm businesses to put down roots. The program’s Agribusiness Incubator offers technical assistance for beginning and experienced farmers who want to be part of the local grazing and dairy economy. Contact Tom Cadwallader, Lincoln/Marathon County Extension, 715-536-0304, thomas.cadwallader@ces.uwex.edu, www.ucanfarm.org

Pennsylvania Center for Farm Transitions helps beginning, retiring, and relocating farmers as well as those who want to change or expand their operations. The center works to assure the future of agriculture in the state. Toll-free telephone: 877-475-2686. www.iplantofarm.com

The average age of American farmers is nearing 60. The nation needs more young farmers.

Linking New Farmers with Retiring Farmers

The National Farm Transition Network fosters the next generation of farmers and ranchers by introducing them to experienced producers who are ready to retire. More than 20 independent organizations belong to the network, representing California, Connecticut, Iowa, Maine, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, Washington, and Wisconsin.

Each of these Farm Link or Land Link groups has its own methods and priorities. To find the organization near you, contact network coordinator John Baker, rbaker@iastate.edu, or check the network Web site, www.farmtransition.org.

Resources for Beginning Farmers

Alabama Sustainable Agriculture Network runs a Farmer-to-Farmer Program that links experienced farmer-mentors with beginning growers. The program requires new farmers to pass on what they have learned to others. For more information, call 256-520-2400. www.asanonline.org/mentorprogram.htm

Appalachian Sustainable Agriculture Project supports farmers and rural communities in the mountains of western North Carolina and the southern Appalachians with education, mentoring, promotion, and community and policy development. For more information: 828-236-1282. www.asapconnections.org

Carolina Farm Stewardship Association provides “farm incubators”—educational farms where new growers can lease a parcel of land and gain access to equipment and advanced knowledge without having to buy it. The program also offers business planning assistance. Contact Bryan Green, 919-451-9804, busha_terra@hotmail.com. www.carolinafarmstewards.org/projects.shtml

The Food To Bank On program connects beginning sustainable farms in northwest Washington with training, mentors and market support while providing fresh high-quality food to Whatcom County’s hungry. Contact Shonie Schlotzhauer, 360-647-7093, x106, Shonie@sustainableconnections.org. www.sconnect.org/foodfarming/Food%20To%20Bank%20On

Georgia Organics’ Farmer Mentoring & Marketing program teams established farmers with new farmers to transfer knowledge and expertise in sustainable growing. The program provides in-depth workshops and training in production, marketing, and financial planning. For more information, call 678-702-0400. www.georgiaorganics.org/about_us/programs_projects.php

Idaho-Rural Roots supports sustainable and organic agriculture and community-based food systems in the Inland Northwest. Their Cultivating Success™ Program provides beginning and existing farmers with the planning and decision-making tools, production skills and support necessary to develop a sustainable small farm. www.cultivatingsuccess.org

The Intervale Center of Burlington, Vermont offers two programs for new farmers. The Intervale Farms Program leases land and facilities to small organic enterprises and provides technical support with other more experienced farmers. Success on Farms works one-on-one with state farmers to strengthen their businesses. For more information, call 802-660-0440. www.intervale.org

Iowa Beginning Farmer Center coordinates education programs and services for beginning farmer and retiring farmers. The center helps farm families develop skills in financial management and planning, legal issues, tax laws, technical production, leadership, sustainable agriculture, health, and the environment. Call 877-232-1999 or e-mail bfc@iastate.edu. www.extension.iastate.edu/bfc

Land Stewardship Project sponsors Farm Beginnings classes each fall in Minnesota, Illinois, Nebraska, North Dakota, and Wisconsin. In the winter participants learn goal setting, financial planning, marketing, and sustainable farming techniques from established farmers and other professionals. In spring and summer participants work with specific farmers and attend farm field days. For more information, call 651-653-0618. www.landstewardshipproject.org/farmbeg.html

Maine Organic Farmers and Gardeners Association operates a Journeyperson Program with hands-on, mentored training to help farmers find land and a situation where they can develop their business. The association also offers a Farmer-in-Residence Program at the 250-acre Common Ground Education Center in Unity, Maine. Contact Andy Marshall, amarshall@mofga.org, 207-568-4142. www.mofga.org

Minnesota Food Association’s New Immigrant Farmer Project provides training for new immigrants and aspiring farmers in gardening, micro-farming, production farming, marketing, and land use planning. For more information, call 651-433-3676. www.mnfoodassociation.org/newimmigrant.aspx

New England Small Farm Institute offers information and training for aspiring, beginning, and transitioning farmers. Their Growing New Farmers program in Belchertown, Mass. provides services and resources for new farmers throughout the Northeast. For more information, call 413-323-4531. www.smallfarm.org, www.growingnewfarmers.org

New Entry Sustainable Farming Project helps immigrants and others with agricultural backgrounds to begin commercial agricultural enterprises in Massachusetts. Contact Jennifer Hashley, 617-636-3793, jennifer.hashley@tufts.edu. www.nesfp.org

National Immigrant Farming Initiative operates several programs for new farmers. New Farmer Development Project educates and supports immigrants in New York City with agricultural experience to become local producers and establish small farms in the region. Contact Michelle Hughes, 212-341-2256, mhughes@greenmarket.cc. www.immigrantfarming.org/index.php?page=New_Farmer_Development_Project

Southeastern Massachusetts Agricultural Partnership is a nonprofit organization that helps local agricultural enterprises achieve economic success. They create demand for locally produced agricultural products and provide business education to local agricultural enterprises. Contact Sarah Kelley, 508-295-2212x50, skelley@semaponline.org. www.semaponline.org

USDA Farm Service Agency offers two financing programs for land purchase by beginning and socially disadvantaged farmers. The new Farm Bill provides for the Land Contract Guarantee Program and the Direct Farm Ownership Loan Program. The Beginning Farmer and Rancher Land Contract Guarantee Program was created because traditional methods of farm entry and farm succession are no longer adequate to meet current challenges. This pilot program will explore whether land contract sales are a viable alternative for beginning farmers and ranchers. The pilot program will be available in Indiana, North Dakota, Oregon, Pennsylvania, Wisconsin, and Iowa. For more information, contact the local Farm Service Agency office. www.fsa.usda.gov

Antonio Roman-Alcala farms at San Francisco’s Alemany Farm. He is a native of the district, which is bordered by busy freeways.
Is a Farm Business Right for You?

By Tammy Hinman, NCAT Program Specialist

When you consider a rural enterprise, it’s vitally important to assess your goals, land, and resources. These considerations may help direct your research and save time and much needed energy for starting a new farm enterprise.

Identify Your Own Personal Values

Do you want to have an organic farm? Do you want to spend more time with your family? Do you want an enterprise that will equal your current salary? Or is a mellow lifestyle your goal?

What Are Your Personal Goals and Vision for Your Property?

While this is closely related to the above point, you can create your goals for your property based on your personal values. This is often left out of business planning templates, but can be an important component in your assessment. It is something that you should come back to when there is a question about what direction you want your business to go.

Assess Your Property

Consider size, location, soils, resources. For example, do you have a wood lot so that you could sell firewood? Is your acreage small? If so, you may need to produce high-value crops.

Soil is a very important part of farming enterprises. Good soil will give you more production options. Water access and cost are issues in many parts of the country. Do you plan to irrigate? If so, do you have sufficient water? What crops do you plan to grow and what are their water and climatic needs? Vegetables and fruit are relatively water-intensive cropping systems.

Market Assessment

Marketing is an often overlooked aspect of developing a new enterprise. A marketing plan can help you prepare for markets before your product is ready. Location, your personality, and production interests are things to consider when developing a marketing plan.

If you are close to an urban area and enjoy working with people, then farmers’ markets or community-supported agriculture (CSA) might be a good way to sell your products. Do you have another occupation? Are you in a very rural area? Then wholesale marketing, which takes less time and energy, might be better suited for you.

Stacy Bliss and John Brenner run a CSA on Broadturn Farm in Scarborough, Maine.

Greenhorns Web Portals for Young Farmers

Film-maker and farmer Severine Fleming is making a documentary film about the growing number of young people eager to supply fresh healthy food to local communities (see www.thegreenhorns.net). Inspired by those she meets, she has created a series of Web and blog sites for them, so they can see what their counterparts are doing all across the country. www.foryoungfarmers.wikispaces.com www.thegreenhorns.wordpress.com
